What is web development?

Web development is the work involved in developing a Web site for the Internet (World Wide Web) or an intranet (a private network). Web development can range from developing a simple single static page of plain text to complex Web-based Internet applications (Web apps), electronic businesses, and social network services.

A more comprehensive list of tasks to which Web development commonly refers, may include Web engineering, Web design, Web content development, client liaison, client-side/server-side scripting, Web server and network security configuration, and e-commerce development.

A more comprehensive list of tasks to which Web development commonly refers, may include Web engineering, Web design, Web content development, client liaison, client-side/server-side scripting, Web server and network security configuration, and e-commerce development.

Here are the HTML tags that I've used:

1. DOCTYPE
2. html
3. head
4. title
5. body
6. p
7. header
8. div
9. h1
10. img
11. a
12. i
13. ul
14. li
15. ol
16. br
17. nav
18. footer
19. style
20. center
21. marquee
22. link
